

Are you ready?

Wildfire season is here.

Be prepared before disaster strikes.

Identify hazards. Have a plan. Be ready.

- ✓ Create a family emergency plan. Make sure everyone knows where to go and how to contact each other during an evacuation. Have an emergency kit with first aid equipment and a sprinkler readily available.*
- ✓ If a wildfire is approaching your home – close all windows and doors in your house. Cover vents, windows and openings to your house with duct tape or pieces of wood. Position your car forward in the driveway.*
- ✓ Tune into local radio stations (or check government websites if possible) for the most up-to-date information on nearby wildfires and road closures.
- ✓ Young children, the elderly and those with chronic lung or heart conditions may be at increased health risk from wildfire smoke. Limit your outdoor activity and keep windows and doors closed while inside.

**Government of Canada*

If someone is injured or in distress – call 911 and ask for **Paramedics.**
