Dear Members;

Re: Employer Funded PCP Training

I wanted to provide an update on employer paid PCP training while we continue to work with BCEHS to finalize an application process for members.

Members who were already enrolled in PCP training, as of the date of the Collective Agreement, January 15, 2023, may be eligible to receive tuition, expenses and salary maintenance.

Any members currently working in regular PCP-level roles, without PCP qualifications, may be eligible to apply for employer funded PCP training, once the application process has been finalized and based on the requirements laid out in the PCP Training Program MOA.

Once the process has been finalized you will receive additional information on how to apply, and eligible members with the most seniority, based on operational needs, will be approved in a priority sequence.

Until you receive communication on this matter and have approval from your unit chief, please do not register for PCP training.

For more information, please see the attached [joint memo](#) and [Memorandum of Agreement – PCP Training Program](#).

Sincerely,

Jason Jackson
Lead Negotiator, APADBA
