Dear Members;

Re: Community Paramedic Regular Part-time to Full-time Positions

After ratification of the collective agreement, the union and BCEHS began work on enhancing the community paramedic staffing model to continue to support community patient care in rural and remote communities.

CP's received notice of regular part-time positions converting to full-time Victor positions earlier this year. And after member feedback and consultation with the union, we are pleased to advise that BCEHS has agreed to offer affected members a choice between moving to an Echo or Victor shift pattern.

This will allow members to continue to do the invaluable work they do within their communities while also maintaining a work/life balance that best suits their needs.

Thank you to all members who provided their feedback.
